REVESTIMIENTO INTERNO EN PIEL U OTRAS TELAS

Présenté au départ en tissu Techno 3D, ce modèle est maintenant réalisable dans différents cuirs ou tissus.

Cependant, les cuirs et les tissus n'étant pas extensibles, il est indispensable d'ajouter des coutures dans la partie intérieure du dossier afin d'assurer une meilleure finition.

IMPORTANT : cette contrainte technique ne permet pas l'utilisation des cuirs d'épaisseur supérieure ou égale à 1,6 mm, des tissus à motifs et à rayures (avec raccord), des velours, des microfibras, des tissus épais, des tissus et cuirs rigides, des faux cuirs et des tissus nécessitant un traitement non-feu.

First shown in Techno 3D fabric, this model is now available in both leather and fabric.

However, since neither fabric nor leather are expandable, it is necessary to add stitching in the interior of the back in order to ensure a better finish.

PLEASE NOTE: this technical issue does not allow us to upholster it with leathers with thickness equals of more than 1,6 mm, striped and patterned fabrics (with repeat), velvets, microfibras, thick fabrics, stiff fabrics and leathers, leather-like fabrics, or fabrics that need fireproof treatment.

Inicialmente presentado en tela Techno 3D, este modelo es actualmente realizable en varias pieles y telas.

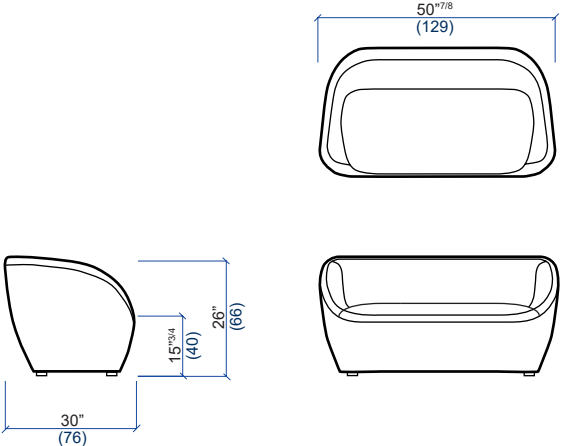

Sin embargo, como las pieles y las telas no son extensibles, es necesario añadir unas costuras en la parte interior del respaldo para garantizar un mejor acabado.

IMPORTANTE: esta limitación técnica no permite el uso de las pieles de un grosor superior o igual a 1,6 mm, de telas con motivos o rayadas (con racords), de terciopelos, microfibras, telas gruesas, telas y pieles rígidas, falsas pieles y de telas que necesiten un tratamiento ignífugo.
